1

PERFORMANCE REDEFINED

Built To Be Driven

A Sports Car with Supercar DNA

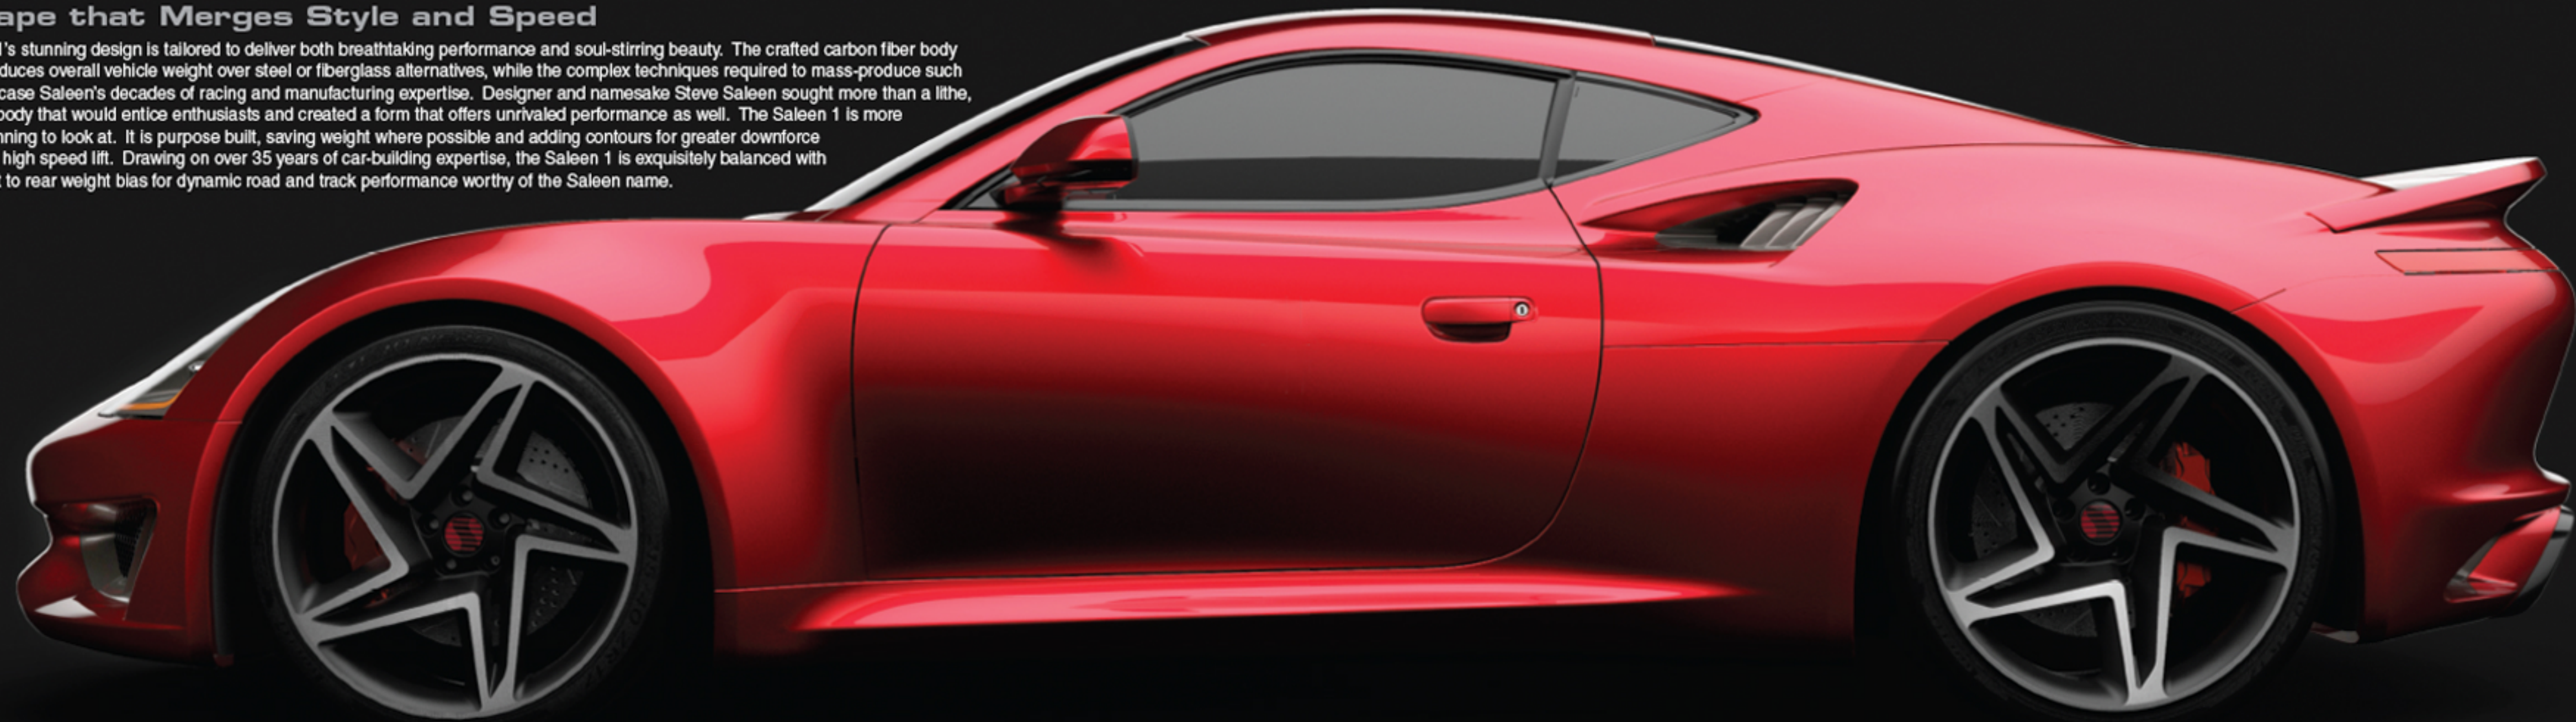

In over 35 years of building performance vehicles, Saleen has earned a reputation for race-bred excellence that transcends expectations both on the road and on the track. The new Saleen 1 writes the next chapter of the Saleen legacy while drawing on the lessons learned from the revolutionary Saleen S7. The achievements of the S7 speak for themselves, with dominant performances at

major race courses around the globe including victories at the 12 Hours of Sebring and the 24 Hours of Le Mans. The Saleen 1 continues that tradition of world-class performance. This is a modern performance car, equally at home on the track or on the street. Featuring advanced electronics, state-of-the-art suspension design and breathtaking power, the Saleen 1 is expertly crafted for pure performance and driving joy.

A Shape that Merges Style and Speed

The Saleen 1's stunning design is tailored to deliver both breathtaking performance and soul-stirring beauty. The crafted carbon fiber body drastically reduces overall vehicle weight over steel or fiberglass alternatives, while the complex techniques required to mass-produce such a body showcase Saleen's decades of racing and manufacturing expertise. Designer and namesake Steve Saleen sought more than a lithe, streamlined body that would entice enthusiasts and created a form that offers unrivaled performance as well. The Saleen 1 is more than just stunning to look at. It is purpose built, saving weight where possible and adding contours for greater downforce and reduced high speed lift. Drawing on over 35 years of car-building expertise, the Saleen 1 is exquisitely balanced with an ideal front to rear weight bias for dynamic road and track performance worthy of the Saleen name.

Own The Road

Elegant Confines

Designed with optimum control, safety and comfort in mind, the interior of the Saleen 1 is every bit as attractive as the exterior. With luxurious leather seating and bold, racing-inspired instrumentation, this cutting-edge cockpit offers daily driving comfort while razor sharp controls give the Saleen 1 the feeling of being an extension of your own body.

Every surface and material of the Saleen 1's interior has been crafted for the optimal driver experience on and off the track, while remaining unmistakably Saleen. With a wide variety of options available, the interior of each Saleen 1 can be customized to each driver's personal preferences.

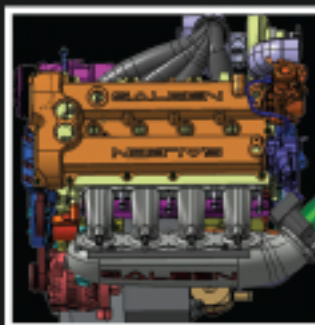

A Modern Masterpiece

The Science of Speed

Engineering a truly world-class performance car requires deep and varied expertise, including advanced aerodynamics, enhanced suspension design, superior engine building, brake setup, and much more. The exterior contours are more than just striking to see. Each curve is formed with precision to help the Saleen 1 slip smoothly through the air. Wind tunnel testing, fluid dynamics, laminar flow, and emissions analytics are just a part of our meticulous engineering process.

Mid-Engined Marvel

The Saleen 1 is a well balanced, road hugging mid-engined marvel. It features an in-house designed, high-output turbocharged inline four-cylinder engine, producing a thrilling

450 horsepower. Mated to a lightweight chassis and carbon fiber body for a total weight of only 2700 lb, the Saleen 1 achieves an astonishing power-to-weight ratio of 6 lbs per horsepower for race-car performance that could only come from Saleen.

Championship Heritage

With a track record of 383 races, 249 podiums, 27 poles, 126 fastest laps, 119 wins, 13 championships and victory at the 24 Hours of Le Mans, Saleen's history of racing success is indisputable. The same racing DNA goes into every production vehicle manufactured by Saleen Automotive. It was on the racetrack that Saleen engineers learned to master the exacting science of aerodynamics, refine vehicle handling and hone drivetrain performance. By using the lessons learned on track, Saleen is able to build vehicles that exhibit both fingertip control on the racetrack and easy drivability for daily use. This ability to translate driver input into swift and perfect execution blurs the line between human and machine, setting Saleen vehicles apart from the pack. From pit lane to carpool lane, the Saleen heritage and winning legacy makes the Saleen 1 one of a kind.

The Saleen Cup Racing Series

Nothing, it is said, improves the breed like racing. Saleen joins forces with the SRO Group to perfect the Saleen 1 breed with its own racing series within the Blancpain GT World Challenge America. Twenty brand new, 100% Saleen-built race cars with individual, classic racing liveries combine with ultra-competitive drivers to create the first ever professional 'Arrive and Drive' series. The Saleen Cup Racing Series will roar through America's most iconic tracks: Sonoma, Watkins Glen, Road America, COTA, Indianapolis and more.
